CONTENTS

Jesús García Falset, Oana Mleşniţe: Coincidence problems for generalized contractions | 1–15

Ignacio Bajo: Forbidden sets of planar rational systems of difference equations with common denominator | 16–32

Milan Merkle, Dan Marinescu, Monica M. R. Merkle, Mihai Monea, Marian Stroe: Lebesgue-Stieltjes integral and Young’s inequality | 60–72

Miodrag S. Petković, Jovana Džunić, Ljiljana D. Petković: On an efficient method for the simultaneous approximation of polynomial multiple roots | 73–94

Emilie Diot, Sébastien Tavenas, Nicolas Trotignon: Detecting wheels | 111–122

Nair M. M. de Abreu, Krystyna T. Balinski, Slobodan K. Simić, Krzysztof T. Zwierzyński: More on non-regular bipartite integral graphs with maximum degree 4 not having ±1 as eigenvalues | 123–154

Sergio Bermudo, Henning Fernau, José M. Sigarreta: The differential and the Roman domination number of a graph | 155–171

Applicable Analysis and Discrete Mathematics 2014 8(1)
INDICE DEL VOLUME 145  
(2010-2011)

COMMENORAZIONI DI ACCADEMICI

Enrico Genazzani (1920 – 2009), commemorazione tenuta dal Socio nazionale Mario Umberto Dianzani 3-6

Mario Fornaseri (1913 – 2009), commemorazione tenuta dal Socio corrispondente Emiliano Bruno 7-10

Bruno Ferretti (1913 – 2010), commemorazione tenuta dal Socio nazionale Vittorio De Alfaro 11-16

NOTE

Antonio Nigro, Chow Classes of Sections of Grassmann Bundles 17-26

Davide Loviso, Susanna Antoniotti, Paolo Ariano, Carla Distasi, Silvia Farcito, Simona Dalmazzo, Mario Ferraro, Alessandra Gilardino, Federico Ruffinatti, Pollyanna Zamburlin, Vedere i neuroni al lavoro 27-34

CENNI SULLE ADUNANZE

Adunanze delle Classi Unite, Presidenza del Prof. Pietro Rossi (a.a. 2010-2011) 35-37

Adunanze della Classe di Scienze Fisiche, Matematiche e Naturali, Presidenza del Prof. Alberto Conte (a.a. 2010-2011) 38-41

Indice delle materie 43
INDICE

Relazione del presidente PIETRO ROSSI sull’attività accademica dell’anno 2010-2011 3-10

La scienza della nuova Italia, Prolusione del Socio nazionale ALBERTO CONTE 11-22

COMMEMORAZIONI DI ACADEMICI

Francesco Lerda (1923–2010), commemorazione tenuta dal Socio nazionale ANGELO RAFFAELE MEO e dal Socio corrispondente GIAMPIETRO ALLASIA 23-33

Enrico Magenes (1923–2010), commemorazione tenuta dal Socio corrispondente LUIGI RODINO 35-38

Antonietta Guardabassi (1918–2010), commemorazione tenuta dal Socio corrispondente CAMILLO VELLANO 39-45

Baccio Baccetti (1931–2010), commemorazione tenuta dal Socio nazionale ALDO FASOLO 47-51

Enea Occella (1928–2011), commemorazione tenuta dal Socio corrispondente SEBASTIANO PELIZZA con la collaborazione di CARLO CLERICI, VANNI BADINO, RENATO MANCINI 53-58

Mario Govi (1927-2009), commemorazione tenuta dal Socio nazionale GIORGIO VITTORIO DAL PIAZ con la collaborazione del Socio corrispondente FRANCA MARAGA 59-74

Sigfrido Leschiutta (1933-2011): a life for time metrology, commemorazione tenuta dal Socio nazionale ANGELO RAFFAELE MEO 75-77

Dionigi Galletto (1932–2011), commemorazione tenuta dal Socio nazionale FRANCO PASTRONE 79-84

NOTE 85-93

FRANCO ANDREONE, SCOTT R. LOARIE, ROBERTA PALA, LUCA M. LUISELLI e ANGUS I. CARPENTER, Trade and exploitation of amphibians and reptiles: a conservation overview 85-93

Cenni sulle adunanze 95-106

Indice delle materie 107
06 Mediação pedagógica: uma possibilidade para o desenvolvimento de atitudes sociais na autonomia
Gustavo H. E. Guimarães e Samuel Mendonça

30 Ações políticas e sociais da educação profissional: alguns aspectos históricos
Michele de Almeida Schmidt e Miguel Alfredo Orth

44 Saberes da experiência: narrativa de formação de professores em um curso a distância
Diva Souza Silva

58 Mundos do trabalho contemporâneo e educação: cenários, perspectivas e desafios
Ivonaldo Leite

72 O olhar do docente em torno do currículo integrado
Maria Sandreana Salvador da Silva Lizzi e Edaguimor Orquiza Viriato

86 Observar para intervir... as crianças com PHDA na aula regular do 1º Ciclo do ensino básico português
Ernesto Candeias Martins e Olga Carapeto

108 Educação online: a transferência na relação professor-aluno
Ilene Figueiredo Pessoa e Sonia Xavier de Almeida Borges

124 Estágio supervisionado em engenharia: mudanças nos aspectos legais e consequências para os futuros engenheiros
Alexandre Cézar de Oliveira Melo e Adriana Maria Tonini

148 Entrevista
Desafios imediatos da Educação Profissional
Francisco Aparecido Cordão entrevista Priscila Cruz

154 Resenha
Brazilian Review of Econometrics

Contents

- A Simple Method for Eliciting Preferences When Exposed to Risk: A Case Study Using Lottery Simulations
  Patricia Langsch Tecles & José Guilherme de Lara Resende 201

- Human Capital and the Recent Decline of Earnings Inequality in Brazil
  Priscilla Albuquerque Tavares & Naercio Aquino Menezes-Filho 231

- Identification of Gaussian Term Structure Models with Observable Factors
  Marco Matsumura, Ajax Moreira & José Valentim M. Vicente 259

- Generalized Tests of Investment Fund Performance
  Márcio Poletti Laurini, Rogério da Costa Monteiro & Antônio Zoratto Sanvicente 271

- Are Dual and Primal Estimations Equivalent in the Presence of Stochastic Errors in Input Demand?
  Maurício Vaz Lobo Bittencourt & Armando Vaz Sampaio 295

- Modeling and Forecasting Realized Volatility: Evidence from Brazil
  Marcos Vinício Wink Junior & Pedro L. Valls Pereira 315

sociedade brasileira de econometria

Volume 31 - Number 2 - November 2011
BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 51, No. 2 April 2014

ARTICLES

Alexander N. Gorban and Ilya Karlin, Hilbert’s 6th Problem: exact and approximate hydrodynamic manifolds for kinetic equations ............... 187

Laure Saint-Raymond, A mathematical PDE perspective on the Chapman–Enskog expansion .......................................................... 247

Vaughan F. R. Jones, Scott Morrison, and Noah Snyder, The classification of subfactors of index at most 5 ........................................ 277

MATHEMATICAL PERSPECTIVES

Gerald L. Alexanderson, About the cover: Hilbert and the Paris ICM .... 329

Marshall Slemrod, A note on the Bulletin cover ................................ 335

Selected Mathematical Reviews .................................................. 337

BOOK REVIEWS

Gestur Ólafsson (Reviewer), Homogeneous spaces and equivariant embeddings, by D. A. Timashev ........................................ 349

Zoran Šunić (Reviewer), Cellular automata and groups, by Tullio Ceccherini-Silberstein and Michel Coornaert ......................... 361

BULLETIN OF THE AMERICAN MATHEMATICAL SOCIETY

CONTENTS

Vol. 51, No. 3  July 2014

ARTICLES

Vladimir Dragović and Milena Radnović, Bicentennial of the Great Poncelet Theorem (1813–2013): Current advances ......................... 373
R. Parimala, A Hasse principle for quadratic forms over function fields .. 447

MATHEMATICAL PERSPECTIVES

Gerald L. Alexanderson, About the cover: Two theorems on geometric constructions .................................................. 463
Selected Mathematical Reviews ............................................. 469

BOOK REVIEWS

Anatoly Libgober (Reviewer), Topology of algebraic curves. An approach via dessins d’enfants, by Alex Degtyarev ......................... 479
David Nualart (Reviewer), Normal approximations with Malliavin calculus. From Stein’s method to universality, by Ivan Nourdin and Giovanni Peccati .......................................................... 491
Michael Eastwood (Reviewer), The ambient metric, by Charles Fefferman and C. Robin Graham ............................................... 499
Frank Sottile (Reviewer), Toric varieties, by David A. Cox, John B. Little, and Henry K. Schenck .............................................. 505
Pavel Exner (Reviewer), Introduction to quantum graphs, by Gregory Berkolaiko and Peter Kuchment ...................... 511
Gilles Godefroy (Reviewer), Fréchet differentiability of Lipschitz functions and porous sets in Banach spaces, by Joram Lindenstrauss, David Preiss, and Jaroslav Tiser ............................................. 515
Serge Tabachnikov (Reviewer), Exterior billiards: systems with impacts outside bounded domains, by A. Plakhov .................. 519

Alexander S. Kechris .................................................................................... 163
David Aldous (Reviewer), Probability on graphs: random processes on
graphs and lattices, by Geoffrey Grimmett ............................................. 173
Laurent Bartholdi (Reviewer), Zeta functions of graphs: a stroll through
the garden, by Audrey Terras .................................................................... 177
Contents

Preface ........................................................................................................................................... i

A Moser-Trudinger inequality for the singular Toda system
Luca Battaglia and Andrea Malchiodi ................................................................. 1

Optimal transportation on the hemisphere
S.-Y. A. Chang, J. Liu and P. Yang ........................................................................... 25

Estimate of an inclusion in a body with discontinuous conductivity
Tu Nguyen and Jenn-Nan Wang ............................................................................... 45

A novel deflation technique for solving quadratic eigenvalue problems
Tsung-Ming Huang and Wen-Wei Lin ................................................................. 57

K-stability and canonical metrics on toric manifolds
Xu-jia Wang and Bin Zhou .................................................................................. 109

A one-phase problem for the fractional Laplacian: regularity of flat free boundaries
D. De Silva, O. Savin and Y. Sire .............................................................................. 111
Contents

Preface ......................................................................................................................... i

Entire subsolutions of fully nonlinear degenerate elliptic equations
   Italo Capuzzo Dolcetta, Fabiana Leoni and Antonio Vitolo ................... 147

New comparison theorems in Riemannian geometry
   Yingbo Han, Ye Li, Yibin Ren and Shihshu Walter Wei ......................... 163

Some results on harmonic maps
   Min-Chun Hong ........................................................................................................ 187

Singularities for a fully non-linear elliptic equation in conformal geometry
   Maria del Mar Gonzalez and Lorenzo Mazzieri ............................................. 223

On the lower semicontinuity of quasiconvex integrals
   Matteo Focardi and Paolo Marcellini ............................................................... 245

Fujita equation with boundary effect
   Tai-Ping Liu and Shih-Hsien Yu ................................................................. 267

Constructing soliton solutions of geometric flows by separation of variables
   Mu-Tao Wang ........................................................................................................ 283

GEOMETRIA

GIUSEPPE CARISTI e MARIUS I. STOKA, A Buffon-Laplace type problem for convex – concave Delone lattice 123-135
April brings a blast of fresh air with diverse new Features and Communications. These include a piece on the use of OpenFOAM software in fluid dynamics, an analysis of the square peg problem, a piece on modern industrial mathematics, a study of how well established undergraduate research is in mathematics, and a discussion of whether libraries and open access are becoming irrelevant. Happy reading!

—Steven G. Krantz, Editor

Features

346 A Survey on the Square Peg Problem

Benjamin Matschke

354 OpenFOAM for Computational Fluid Dynamics

Goang Chen, Qingang Xiong, Philip J. Morris, Eric G. Paterson, Alexey Sergeev, and Yi-Ching Wang

364 An Introduction to Modern Industrial Mathematics

C. Sean Bohun
The February issue showcases a mixture of mathematics and mathematical culture. We have a feature article on the potential theory of the ellipsoid and another on two-person fair division of indivisible items. On the other hand, we have an article on the relationship of the National Security Agency and the National Institute of Standards and Technology. There is also a piece on the JUMP Math program for getting kids interested in mathematics at an early age. Finally, there are the experiences of an American mathematician who spent a year in Moscow in the 1970s.

—Steven G. Krantz, Editor

ROSTOCKER MATHEMATISCHES KOLLOQUIUM

Heft 68

IAN SCHINDLER; KYRIL TINTAREV

DIETER SCHOTT

MANFRED KRÜPPPEL

HARRY POPPE

NESRINE BENYAHIA TANI; ZAHRA YAH; SADEK BOUROUBI

DIETER L ESEBERG

The limiting Dirac-Sobolev inequality

Projection kernels of linear operators and convergence considerations

Two-Scale Difference Equations and Power Sums related to Digital Sequences

An abstract Alaoglu theorem

Ordered and non-ordered non-congruent convex quadrilaterals inscribed in a regular n-gon

UNIVERSITÄT ROSTOCK
INSTITUT FÜR MATHEMATIK
2013
CONTENTS

Pseudo-Anosov Maps and Pairs of Filling Simple Closed Geodesics on Riemann Surfaces, II
Chaohui ZHANG ........................................................................................................... 289

The Lefschetz Elements of Coinvariant Algebras of Binary Polyhedral Groups
Sachiko YOSHIDA .......................................................................................................... 309

A Remark on Spectral Properties of Certain Non-selfadjoint Schrödinger Operators
Daisuke AIBA .............................................................................................................. 337

Characterization of Arithmetical Equivalence of Number Fields by Galois Groups with
Restricted Ramification
Mitsul TOHKAILIN and Manabu OZAKI ...................................................................... 347

Fourth Moment of the Riemann Zeta-function with a Shift along the Real Line
Shun SHIMOMURA ....................................................................................................... 355

Surfaces with Constant Chebyshev Angle II
Carlos M. C. RIVEROS and Armando M. V. CORRO .................................................. 379

Torsion Points on Hyperelliptic Jacobians via Anderson’s p-adic Soliton Theory
Yuken MIYASAKA and Takao YAMAZAKI .................................................................. 387

Rédei’s Triple Symbols and Modular Forms
Fumiya AMANO, Hisatoshi KODANI, Masanori MORISHITA, Takayuki SAKAMOTO and
Takafumi YOSHIDA with Appendix by Takeshi OGASAWARA .................................... 405

Counting Links and Knots in Complete Graphs
Loren ABRAMS, Blake MELLOR and Lowell TROTT ................................................... 429

Generalized Koszul Resolution
Satoshi MOCHIZUKI and Akiyoshi SANNAI ................................................................ 459

Interface Regularity of the Solutions for the Rotation Free and the Divergence Free Systems in
Euclidian Space
Makoto KANOU, Tomohiko SATO and Kazuo WATANABE ........................................... 473

Some Inequalities for Power Series of Two Operators in Hilbert Spaces
Sever Silvestru DRAGOMIR and Mitsuru UCHIYAMA ............................................... 483

Vector-valued Maximal Inequalities on Weighted Orlicz-Morrey Spaces
Kwok-Pun HO .............................................................................................................. 499

Intersection of Stable and Unstable Manifolds for Invariant Morse Function
Hitoshi YAMANAKA ..................................................................................................... 513

Multidimensional Shintani Zeta Functions and Zeta Distributions on \( \mathbb{R}^d \)
Takahiro AOYAMA and Takashi NAKAMURA .......................................................... 521

On a Reduction of Nonlinear Partial Differential Equations of Briot-Bouquet Type
Hidetoshi TAHARA ..................................................................................................... 539
CONTENTS

Absos Ali Shaikh and Helaluddin Ahmad: Some transformations on $(LCS)_n$-manifolds .......................................................... 1
